Message from the Chair

As I begin my term as CSE Department Chair, I am honored to have the opportunity to represent a department that has shown so much initiative, resilience and dedication.

At times like these, it is important that we all reaffirm our core values: better and federal policies that create new challenges for our international students. As a community, we face a pandemic that much initiative, resilience and dedication.

For more news about Computer Science and Engineering department graduates, check out our Alumni Honors.

COVID-19 UPDATES, RESOURCES & Research

Managing unanticipated challenges is something we can do together. UC San Diego is making every effort to support students, faculty and staff. Here are a few helpful links to answer your questions:

- Updates
- Return to Learn
- Fall Plan
- COVID-19 UPDATES, RESOURCES & Research

A Unique Spring Quarter

For years, spring quarter at UC San Diego has been a brand new experience. Like other faculty, Voelker had to adapt a curriculum that involves very hands-on components, such as the CSE computer lab to build a distributed, real-time, 3D multiplayer game. The entire course had to be assembled online.

Voelker has been teaching CSE 125, Software System Design and Implementation for twenty years, but spring quarter 2020 was a brand new experience. Like other faculty, Voelker had to adapt a curriculum that involves very hands-on components, such as the CSE computer lab to build a distributed, real-time, 3D multiplayer game. The entire course had to be assembled online.
